SIR: I have the honor to submit herewith for publication the thirty-ninth issue of the Statistical Abstract of the United States.

Respectfully,

Chief of Bureau.

To Hon. WILLIAM C. REDFIELD,
Secretary of Commerce.

EXPLANATORY NOTES.

The condensed statistics contained in this volume, unless otherwise stated in connection with the individual tables, represent, or are based upon, official figures collated and published under the various laws of the United States or those of other countries to which they may relate. The sources to which the various tables are credited will indicate where application should be made for additional details, with the exception that certain tables for which no credit appears are derived from regular reports of the Bureau of Foreign and Domestic Commerce, Department of Commerce, and that Table No. 385 is derived largely from corresponding data presented for shorter periods in previous tables.

General imports.—Tables Nos. 241 and 242 embrace imported articles entered at the customhouses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 248, 249, and 250, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period will always differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

Import values.—All invoices of imported merchandise shall be made out in the currency of the place or country from whence the importations shall be made, or, if purchased, or agreed to be purchased, in the currency actually paid, agreed upon, or to be paid therefor, shall contain a correct, complete, and detailed description of such merchandise and of the packages, wrappings, or other coverings containing it, and shall be made in triplicate or in quadruplicate in case of merchandise intended for immediate transportation without appraisement, and signed by the person owning or shipping the same, if the merchandise has been actually purchased, or price agreed upon, fixed, or determined, or by the manufacturer or owner thereof, if the same has been procured otherwise than by purchase, or agreement of purchase, or by the duly authorized agent of such purchaser, seller, manufacturer, or owner.

All such invoices shall, at or before the shipment of the merchandise, be produced to the consular officer of the United States of the consular district in which the merchandise was manufactured, or purchased, or contracted to be delivered from, or when purchases or agreements for purchase are made in several places, in the consular district where the merchandise is assembled for shipment, as the case may be, for export to the United States, and shall have indorsed thereon, when so produced, a declaration signed by the purchaser, seller, manufacturer, owner, or agent, setting forth that the invoice is in all respects correct and true and was made at the place from which the merchandise is to be exported to the United States; that it contains, if the merchandise was obtained by purchase, or agreement for purchase, a true and full statement of the time when, the place where, the person from whom the same was purchased, or agreed to be purchased, and the actual cost thereof, or price agreed upon, fixed, or determined, and of all charges thereon, as provided by the act of October 3, 1913; and that no discounts, rebates, or commissions are contained in the invoice but such as have been actually allowed thereon, and that all drawbacks or bounties received or to be received are shown therein; and when obtained in any other manner than by purchase, or agreement of purchase, the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value is the price at which the merchandise described in the invoice is freely offered for sale to all purchasers in said markets, and that it is the price which the manufacturer or owner making the declaration would have received, and was willing to receive, for such merchandise sold in the ordinary course of trade in the usual wholesale quantities, and that it includes all charges thereon as provided by the act of October 3, 1913, and the actual quantity thereof; and that no different invoice of the merchandise mentioned in the invoice so produced has been or will be furnished to anyone. If the merchandise was actually purchased, or agreed to be purchased, the declaration shall also contain a statement that the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser or agreed to be paid, fixed, or determined.

Whenever imported merchandise is subject to an ad valorem rate of duty, or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the actual market value

or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the seller, shipper, or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, and if there be used for covering or holding imported merchandise, whether dutiable or free, any unusual article or form designed for use otherwise than in the bona fide transportation of such merchandise to the United States, additional duty shall be levied and collected upon such material or article at the rate to which the same would be subjected if separately imported. The words "value," or "actual market value," or "wholesale price," whenever used in the act of October 3, 1913, or in any law relating to the appraisement of imported merchandise, shall be construed to be the actual market value or wholesale price of such or similar merchandise comparable in value therewith, as defined in that act. [Rev. Stats., 336, secs. 18 and 11 of the act of June 10, 1890, or other laws or regulations, as amended by act of Oct. 3, 1913. For full details regarding methods provided for ascertaining the actual "import" or "market" values in question (requirements and duties of sellers, purchasers, manufacturers, owners, agents, importers, shippers, consignors, consignees, consuls, collectors, appraisers, other persons, and production and consumption, fines, penalties, exactions, forfeitures, modifications, effect of decisions of courts of competent jurisdiction, etc.) see the complete act of 1913.]

Domestic exports.—Tables Nos. 243 and 244 exhibit the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported, or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported. (Rev. Stat., 337, and act of Apr. 29, 1902.)

Foreign exports.—Table No. 245, called "foreign exports," or "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported from "warehouse" is their import value. The value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Foreign merchandise in transit or transshipped.—Table No. 253 exhibits foreign merchandise brought to the United States for immediate transit across the territory of the United States to a foreign country, or for transshipment in the ports of the United States to a foreign country. The value of the commodities returned in this table is determined in a similar manner to that of imports.

Warehoused merchandise.—Table No. 252 exhibits imported merchandise in warehouse. This merchandise has already appeared in the statements of *general imports*, Tables Nos. 241 and 242, for the year in which it was imported. The official values of the articles therein represented are the same as the *import values*.

Weights and measures.—The term "ton," as applied to weight, is specified "long" (2,240 pounds) or "short" (2,000 pounds). The term "ton," as applied to vessel measurement, is specified as "net," equal to 100 cubic feet of carrying capacity exclusive of deductions for space occupied by cabins, machinery, etc., or "gross," equal to 100 cubic feet of the entire carrying capacity inclusive of such space. The term "M feet" used in connection with the measure of lumber, etc., signifies 1,000 feet, board measure, a "foot" of such measure being 1 foot long, 1 foot wide, and 1 inch or less in thickness. "Cubic feet" or "cords," as applied to the measurement of lumber, pulp wood, etc., signifies cubic contents. According to section 3249, Revised Statutes, "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of 0.7939 at 60° Fahrenheit." The official gallon prescribed is one containing 231 cubic inches, or 58,372.2 grains, equal to 8.3389 pounds of distilled water at its maximum density, weighed in air of a temperature of 62° Fahrenheit and barometric pressure of 30 inches. The taxable gallon differs from the proof gallon by reason of the fact that in computing taxable gallons under section 3251, Revised Statutes, all fractional parts of a gallon less than one-tenth are excluded.

No. 14.—IRRIGATION: Approved Projects Commenced, Area to be Reclaimed, with Estimated Cost of Completed Projects, and Percentage of Completion, to June 30, 1917, by United States Reclamation Service.

[Source: The United States Reclamation Service, Department of the Interior. Complete statistics relating to irrigation in the United States have been collected in census years only. The figures given in the following table relate only to lands served by works controlled by the United States Reclamation Service. In 1915 the Government projects watered 857,000 acres, and the projects under way, when completed, will serve about 1,500,000 acres. In 1909 the acreage so served (390,000 acres) constituted 2.9 per cent of the total acreage irrigated in the United States, since which time the latter acreage has increased about 10 per cent.]

[1] Data are for the calendar year (irrigation season) except on Salt River project (Arizona), figures for which relate to the corresponding agricultural year, October, 1914, to September, 1915. Figures of acreage and value are restricted to irrigated areas except as explained in notes 4 and 5. Figures of yield are restricted to irrigated areas covered by crop reports, excluding about 40,000 acres irrigated but not covered by crop reports and small areas cropped by dry farming on a few projects except as explained in note 4. All figures of value are intended to show the value received by the farmer for his crops whether sold on the farm or in town, with or without baling, boxing, etc. If fed by the farmer, the crop is given a value representing the selling price on the farm.

[2] Tons.

[3] Pounds.

[4] Total figures for the Yuma project in Arizona and California include $39,700 not listed under any crop, being estimated value derived from feeding alfalfa straw after thrashing for seed, pasturing stalk land, etc.

[5] Crop reports for the Sun River project (Montana) cover 164 irrigated farm units, which included 4,243 acres irrigated and cropped, also 2,422 acres cropped without irrigation, all of which are represented in the figures for the separate crops, but not in the total, which is restricted to the irrigated acreage. Figures for the total value of crops of the Sun River project are the estimated value of irrigated crops only.

[6] Represents irrigated acreage covered by crop reports.

* Data are for calendar year (irrigation season) except on Salt River project. Data regarding Arizona are for corresponding agricultural year October, 1914, to September, 1915. Figures are restricted to irrigated areas excepting as noted for Sun River project, Montana.

[1] Includes $39,700 not listed under any crop, being estimated value derived from feeding alfalfa straw after thrashing for seed, pasturing stalk land, etc.

[2] Crop reports for the Sun River project, Montana, covered 164 irrigated farm units, which included 4,243 acres irrigated and cropped, also 2,422 acres cropped without irrigation, all of which are represented in the figures for the separate crops, but not in the total, which is restricted to the irrigated acreage. All figures are intended to show the value received by farmer for his crops, whether sold on farm or in town, with or without baling, boxing, etc. If fed by farmer, crop is given a value representing selling price on farm.

[3] Limited to irrigated areas covered by crop reports. In addition 41,872 acres were irrigated; estimated total crop value, $19,000,000.

No. 26.—DENSITY OF POPULATION PER SQUARE MILE AT EACH CENSUS, 1790 TO 1910: By States.

[Source: Reports of the Bureau of the Census, Department of Commerce.]

[Note.—In computing density of population for the United States, the areas and population of Alaska, Hawaii, and Porto Rico in 1900 and 1910, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the States and Territories in which they are severally situated, and in that of the United States, although the population of these Indian reservations was not ascertained, and for this reason can not be considered in figuring density of population at the censuses prior to 1890.]

[1] Population of incorporated places having 2,500 or more inhabitants in 1910. The figure for 1900 does not represent the urban population according to that census, but denotes the population in that year of the territory classified as urban in 1910.

[2] Total, exclusive of urban. (See note 1.)

[3] While the drainage of lakes and swamps in Illinois and Indiana caused some increase in total area between 1900 and 1910, the building of the Roosevelt and Laguna Reservoirs and the formation of the Salton Sea in California resulted in a net decrease of total acreage as indicated.

[1] A minus sign (—) denotes decrease.

[2] Acreage reports for miscellaneous seeds were consolidated with those for minor field crops in 1900.

[3] Several crops or farm products for which the Census Bureau has no separate acreage reports yielded considerable returns. The acreage of cotton seed, if separately reported, would be a duplication of the acreage of cotton; that of grass seed, of hay and forage crops; and that of vegetable and flower seeds, of vegetables and of flowers and plants. Such products as flax fiber, flax straw, other straw, and cornstalks and leaves come from the acreage reported under cereals. No acreage could be given for the maple sugar and sirup or forest products. The number of trees of bearing age and the number not of bearing age were thought to be more satisfactory as a measure of the extent of the fruit and nut industry than acreage, and, therefore, acreage reports are not shown except for small fruits.

No. 127.—SUMMARY OF MANUFACTURES: BY SPECIFIED INDUSTRIES, CALENDAR YEARS 1909 AND 1914.

[Source: Reports of the Bureau of the Census, Department of Commerce. The figures for some industries do not represent the total production, because certain important establishments which incidentally manufacture the same class of products are engaged primarily in other lines of manufacture and the statistics for them are accordingly included with those of other industries. Primary horsepower includes power generated in manufacturing establishments plus electric and other power rented from outside sources; it does not include the power of electric motors run by current generated in the same establishment.]

Industry.	Census year.	Number of establishments.	Persons engaged in industry.				Primary horsepower.	Capital.	Salaries.	Wages.	Cost of materials.	Value of products.	Value added by manufacture (value of products less cost of materials).
			Proprietors and firm members.	Salaried employees.	Wage earners (average number).	Total.		Expressed in thousands.

[1] The act of Congress approved Apr. 30, 1912, authorized the Bureau of the Census to collect statistics of leaf tobacco held on Apr. 1 and Oct. 1 of each year. It provided that a report should be secured from each manufacturer of tobacco who, according to the returns of the Commissioner of Internal Revenue, manufactured during the preceding calendar year more than 50,000 pounds of tobacco; from each manufacturer of cigars who manufactured more than 250,000 cigars; from each manufacturer of cigarettes who manufactured more than 1,000,000 cigarettes; and from each dealer in leaf tobacco who, on an average, had more than 50,000 pounds of leaf tobacco in stock at the ends of the four quarters of the preceding calendar year. The first report made under the provisions of this law was of leaf tobacco held on Oct. 1, 1912, and statistics have been collected regularly since that date.

[1] The reports from which this table is made up are rendered at different dates, the average of which is about June, 1915. In a few cases, where the company owns a large number of service cars compared with the number of passenger cars owned, the total number of such service cars has been omitted. In the case of electrified steam railroads, mileage is included in all cases; but under cars only electric locomotives and electric motor cars are given. Gasoline-motor passenger cars are included under motor passenger cars, but in most cases the miles of track over which they operate have been omitted from the mileage column.

[1] During the first six months of the year 1914 rates paid on grain, flour, and provisions were quite low as compared with previous years; the European war, however, shortly after the beginning of hostilities, created a tremendous demand for tonnage and forced rates to the highest level known to this generation of shippers. Complete statements of freight averages for 1914 and 1915 are therefore impossible.

No. 246.—VESSELS ENTERED AT AND CLEARED FROM SEAPORTS OF THE UNITED STATES FROM AND TO FOREIGN COUNTRIES: TONNAGE, 1892 TO 1916, BY COUNTRIES.

[The "net ton" equals 100 cubic feet of carrying capacity, exclusive of deductions for space occupied by cabins, machinery, etc. Lack of uniformity in rules for the measurement of tonnage probably affects the accuracy of the figures presented.]

No. 247.—VESSELS ENTERED AT AND CLEARED FROM CUSTOMS DISTRICTS[1] OF THE UNITED STATES FROM AND TO FOREIGN COUNTRIES: TONNAGE, YEARS ENDED JUNE 30, 1914 TO 1916.

[The "net ton" equals 100 cubic feet of carrying capacity, exclusive of deductions for space occupied by cabins, machinery, etc. Lack of uniformity in rules for the measurement of tonnage probably affects the accuracy of the figures presented.]

No. 248.—NATIONALITY OF THE FOREIGN TONNAGE AND TOTAL AMERICAN TONNAGE ENTERED AND CLEARED AT SEAPORTS OF THE UNITED STATES FROM AND TO FOREIGN COUNTRIES: 1890 TO 1916.

[The "net ton" equals 100 cubic feet of carrying capacity, exclusive of deductions for space occupied by cabins, machinery, etc. Lack of uniformity in rules for the measurement of tonnage probably affects the accuracy of the figures presented.]

[1] See also prior table of "Merchandise imported into and exported from the United States and excess of imports or exports, by countries," p. 375.

[2] The marked discrepancy between the United States figures of exports to the Philippine Islands prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

[1] Years specified in the stub represent commercial years instead of years of growth. This explains the apparent difference between this table and reports of the Bureau of the Census.

[2] Covering as nearly as possible the crop grown during the preceding calendar year and picked mainly during the cotton year specified in the stub.

[3] 1863–1910, market prices; subsequently, growers' prices.

[4] Statistics cover 14 months.

[5] Excess of foreign exports over total imports.

[6] Equivalent 400-pound bales.

[7] Statistics for August, 1914, are included in both 1914 and 1915.

No. 295.—DISTILLED SPIRITS, WINES, AND MALT LIQUORS: Quantities Consumed and Average Annual Consumption per Capita in the United States, 1850 to 1916.[1]

[Source: The production of domestic wines has been estimated by the Department of Agriculture, by Mr. J. W. Schopp, of Bonfortis Wine and Spirit Circular (Inc.), New York, and other well-informed persons. The production of domestic spirituous and malt liquors has been derived from the reports of the Commissioner of Internal Revenue. The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, or since 1906 withdrawals for denaturation, free of tax. For 1916 these amounts were 2,745,790 and 84,532,253 tax gallons, respectively.]

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

[1] The price on board fixed at Baltimore by the Seaboard Coal Association.
[2] Price of soft-coal pool.
[3] Owing to unusual conditions in the coal market the association price for 1902 is not a correct guide as to the actual selling price, Clearfield coal selling as high as $7 at the mines and as high as $9 in New York Harbor. Unsettled conditions lasted until Mar. 1, 1903, or nearly so; then, on Apr. 1, prices were made $3.30 at Baltimore; later on in the year this price was discounted from 10 to 15 per cent.
[4] Shipments nominal. No sales made after 1908.
[5] Cumberland coal now includes "thin seam" as well as "big vein" coal, the former selling about 25 cents per ton lower than the latter.
[6] Freight on "big vein" coal to Baltimore having been reduced 15 cents, $2.60 in 1909 and subsequent years is equivalent to $2.75 in 1908 and previous years.
[7] Nominal; includes State tax of 10 cents per ton in 1913.
[8] During the latter months of 1916 there was a marked increase in the price of "spot" or free coal as compared with that of contract coal. It would probably not be far out of the way to say that during the last quarter of the year the former sold for twice the price of the latter.

[2] $12,445,564 in gold coin and $62,365,800 in gold certificates was held by Federal reserve banks and Federal reserve agents against Federal reserve notes, July 1, 1915, and $8,963,000 in gold coin and $151,577,000 in gold certificates were so held on July 1, 1916.

[3] For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government. Gold coin became available for circulation Jan. 1, 1879, as a result of the resumption act of Jan. 14, 1875. Silver certificates were authorized by acts of Feb. 28, 1878, and Aug. 4, 1886.

[4] Subsidiary silver, which disappeared from circulation in 1862, was reintroduced under operation of the act of Jan. 14, 1875.

[5] As the result of special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.

[6] The Director of the Mint made a revised estimate of the stock of subsidiary silver coin Sept. 1, 1910; as a consequence of such revision there was a reduction of $9,700,000.

[1] The law provides for a tax on wine made in imitation of champagne, etc., but no internal revenue was derived from the same during the fiscal years 1884–1898. The amounts thus received in some of the subsequent years are so small as to be negligible in this or the table following, except in 1905 when they amounted to nearly $700, included under distilled spirits as $1,000.

[2] From 1884 to 1890, inclusive, year ended Apr. 30.

[1] Presidential appointees in the Public Health Service are Surgeon General, and assistant, 13 senior surgeons, 70 surgeons, 70 assistant surgeons, and 37 passed assistant surgeons

[2] Positions in the Coast Guard not transferred to military service.

[3] Positions of deputy collector transferred from the excepted to the competitive class by expiration of the two-year exception contained in the tariff act of Oct. 3, 1913 (38 Stat. 180), and accordingly transferred from the excepted to the competitive column in this table, 550.

[4] The total number of trade and labor positions in the navy-yard service is estimated at 25,000, of which about one-fifth are those of unskilled laborers. The number appointed was 17,296, and the figures in the table are based upon these data.

[5] Post-office inspectors 420; clerks at headquarters, division of post-office inspectors, 100.

[6] The 9,175 positions in the presidential column are those of first, second, and third class postmasters.

[7] Presidential appointees in the Interior—field service, 99 registers and 98 receivers of land offices, 13 surveyors general, governors of Alaska and Hawaii, Secretary of Hawaii, 6 miscellaneous in Indian Service, 3 members Alaskan Engineering Commission, and 1 mine inspector for Alaska.

[8] The number of competitive employees under the Department of Justice in the field is smaller by 176 than printed in the thirty-second report, because 176 deputy marshals excepted by the deficiency act of Oct. 22, 1913, have been deducted,186 deputy marshals were appointed and 163 were separated from Oct. 22, 1913, to June 30, 1915, making a net gain of 23, which added to the 176 originally excepted increased the number excepted on June 30, 1915, as published in the thirty-second report, by 199.

[9] It has not been found practicable to separate the employees in the Department of Labor from those in the Department of Commerce.

[10] The total number of competitive positions in the field service on July 1, 1915, is 127 smaller than printed in last year's table. 49 civilians in the Coast Guard were added, and 176 deputy marshals excepted by the deficiency act of Oct. 22, 1913, were deducted, making a net diminution of 127. The total number of excepted positions in the field service is larger by 199 than printed in last year's report, the increase being made up of the said 176 deputy marshals plus 23 appointed from Oct. 22, 1913, to June 30, 1915.

[11] Only changes in the force of canal employees subject to examination are included in the body of this table.

[1] The civil-service rules prior to April, 1903, defined the departmental service to include all classified positions except those in the Post Office, Customhouse, Internal Revenue, and Government Printing Services. The majority of such positions is found in the field, not in the departments at Washington, but former reports have shown them as "Departmental," following the civil-service rule referred to. In this report an effort has been made to limit "Departmental" to its original meaning, showing field-service examinations under a separate heading, hence the apparent great discrepancy in the "Departmental" figures as compared with those of previous reports.

[2] The large increase in field-service figures for 1913 is due to the inclusions of navy-yard artisans' positions to the number of about 16,000 in the competitive classified service.

[7] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[8] Total specie in circulation; gold and silver were not separately stated prior to 1876. [9] Estimated.

[10] As the result of special investigation by the Director of the Mint a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of $9,700,000 was made in the estimate of silver coin.

[4] Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

[5] 1821; no complete data for 1820 or earlier years.

[1] The statistics since 1913 represent the commerce of the districts named in the boxhead, as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914 the statistics given in this table for Massachusetts and Maryland were returned as for the (former) districts of Boston and Baltimore, respectively.

[1] Prior to 1875 the customs district of Texas.

[2] The statistics since 1913 represent the commerce of the districts named in the boxhead as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914, the statistics given in this table for Buffalo and Michigan were returned as for the (former) districts of Buffalo Creek and Detroit, respectively.

† The production statistics are exclusive of linters and relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898.

[1] Cleaned rice; 1800 to 1903, commercial move ment, as given by Dan Talmage's Sons Co.; 1904 to date as reported by the Department of Agriculture.

[6] Exclusive of fast freight line service.

[7] Overvalued by reason of depreciation of Brazilian paper milreis.

[8] Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.

[9] Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.

[10] Figures for railroads exclude switching and terminal companies not segregated prior to 1908; also, 1913 to date, except for "miles in operation," the mileage of so-called small roads having operating revenues below $100,000 for the year.
